Impact of differences in national patent laws

Anette Hegner

A world of different laws

Common law

Civil law

A world of different Rules/Requirements

First to file – first to invent (first inventor to file)
Prior art – Novelty/inventive step
Requirement to inventive step
Grace period
Best mode
Examples and embodiments
Possibility for amending claims
Divisionals/continuations

A world of different languages

Translation may be required

- of claims
- of whole text
- of cited prior art
- of priority document(s)

Add to cost

Consider from the start
where the patent may
be obtained

A world of different cost

Claim fees varies considerably

In some countries the number of claims can be reduced for reducing cost – in other you must pay for the number of claims in PCT

Add to cost

Total cost varies considerably (10 page, 10 claims)

An average EP (excl. drafting cost) patent cost about 30.000 Euro

An average US (excl. drafting cost) patent cost about 10.000 Euro

An average JP (excl. drafting cost) patent cost about 15.000 Euro

A world of different scope

Claims are interpreted different

Even when granted from same EP patent

Progress on making a unified EP patent court

Strength
Enforceability

Literal scope
Equivalent scope
Purposive construction

A world of different litigation systems

In US claims are construed by a judge –
infringement is determined by a jury.
The appeal court is special for patent cases
Full discovery

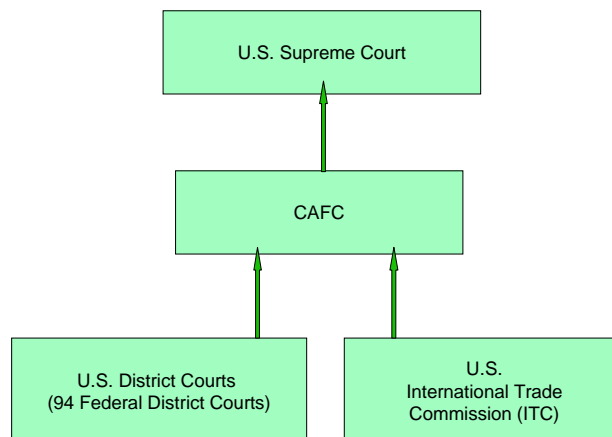

In DE a few courts deal with patent cases.
The Judges are technical educated
No discovery

In UK a patent suit can be filed in Patent county
court or high court – the Judge has technical
assistance.
Limited discovery

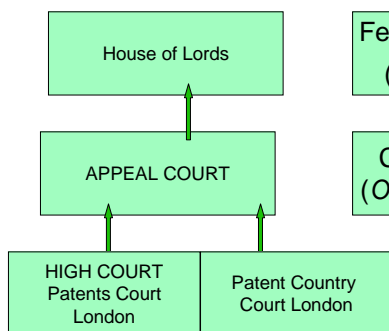

Different
results
Different
cost
Different
time frame

United versus (Dis)harmonized Court Systems U.S. Court Structure
